

# KENTUCKY MARE CUBES®

## CONCENTRATED EQUINE SUPPLEMENT

- Formulated for use when Caloric Supplementation is Unnecessary
- Assures Appropriate Protein, Vitamin and Mineral Supplementation
- Uncomplicated, Efficient and Versatile Applications

Kentucky Mare Cubes is a highly concentrated source of proteins, vitamins and minerals designed for the supplementation of foals, weanlings, yearlings, gestating and lactating mares. When pasture or hay maintains appropriate body condition there is no need to supplement the mature or growing horse calorically. Fed correctly, Kentucky Mare Cubes provide the levels of critical fortification required.

Kentucky Mare Cubes is an extremely palatable and easy to use 1/2 inch cube. Kentucky Mare Cubes is often preferable in outside feeding scenarios where the minimization of waste is a critical concern. Pelleted feeds are less problematic during winter feeding when textured rations can become hard and difficult to use and in summer when sticky molasses based feeds can serve as an insect attractant.

### Feeding Instructions

Kentucky Mare Cubes are designed to be fed at 1-3 pounds per day depending on the horse's size, body condition, stage of development or reproductive stage. Always provide clean, fresh water and high quality hay.

### NUTRIENT ANALYSIS

Protein	<b>25%</b>
Digestible Energy	<b>1205 kcal/lb</b>
Fat	<b>3%</b>
