REDUCED GLYCEMIC TECHNOLOGY IN A TRADITIONAL STYLE

- For Young Horse Development and Mature Horse Maintenance
- Utilizes the Latest Scientific Innovations
- Nutrient Dense Textured Feed

NUTRIENT ANALYSIS

Protein	14%
Digestible Energy	1370 kcal/lb
Fat	6.0%
Fiber	11.5%
Calcium	.9%
Phosphorus	.7%
Zinc	150 ppm
Copper	50 ppm
Vitamin A	8,765 IU/lb
Vitamin D	1125 IU/lb
Vitamin E	100 IU/lb
Selenium	.3 ppm

Hallway Feeds manufactures a revolutionary new series of feeds supported by its Edge Technology® initiative and recent research breakthroughs. Studies show horses that consume high levels of cereal grains develop exceptionally high glucose levels 2-4 hours after eating. Researchers hypothesize that insulin produced during starch (cereal grain) digestion may hinder proper skeletal development and integrity.

Edge Technology based products use “super-fibers” which are digested as fiber in the caecum, but provide readily accessible forms of energy, equivalent to 90% the value of oats. Hallway Feeds compliments these fiber sources with vegetable oil which is 2 ¼ times more energy dense than cereal grains. RG 14 is fortified with Stamm 30®, providing bioavailable sources of critical micronutrients to both mature and developing horses.

Feeding Instructions

RG 14 is designed to be fed at 6-18 pounds per day depending on the horse's size, body condition, development and reproductive stage. RG 14 is fully-fortified, so additional protein, vitamin or mineral supplements are unnecessary if fed as directed. Always provide clean, fresh water and high quality hay.
