Phosphorus	.6%
Zinc	122 ppm
Copper	40 ppm
Vitamin A	6,475 IU/lb
Vitamin D	850 IU/lb
Vitamin E	50 IU/lb
Selenium	.3 ppm

Special 13 has long set the standard for textured sweet feeds. Developed with the commercial breeding farm in mind, Special 13 is equally effective in maintaining lactating broodmares and providing required nutrients to developing young horses.

The highest quality rolled and whole grains wrapped in molasses make Special 13 an extremely palatable and digestible source of proteins, calories, vitamins and minerals. Its unique formula allows it to be the sole ration for management that demands simplicity and flexibility.

Special 13 is fortified with Stamm 30®, the industry's most highly valued equine protein, vitamin and mineral supplement. Stamm 30 provides bioavailable sources of critical micronutrients to both mature and developing horses.

Feeding Instructions

Special 13 is designed to be fed at 6-18 pounds per day depending on the horse's size, body condition, and development or reproductive stage. Special 13 is fully-fortified, so additional protein, vitamin or mineral supplements are unnecessary if fed as directed. Always provide clean, fresh water and high quality hay.
